# Specialized Wood Products

We like to think of ourselves as the Company that serves both large and small Customers. We can handle your wood needs that no one else will consider.

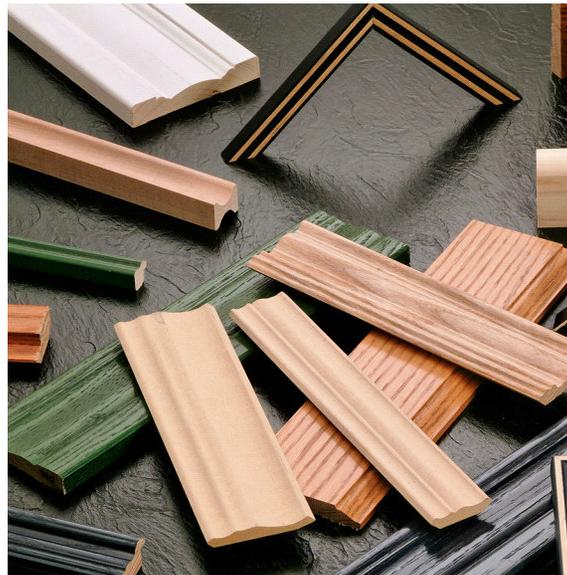

We serve a wide range of markets that include Housing, Furniture, Cabinetry, Picture Frame, Boating and Historical Renovation.

We are regarded as the “One” Company that can meet all of your moulding and finishing needs.

## Custom Moulding

We started our business as a Custom Moulding shop in 1986. When a Customer wanted a moulding that was a little different from their competition, we were able to design and produce a unique custom moulding for them, all in-house. Today, we offer even more custom services.

Many of our mouldings are produced using MDF, Lumber Core or Hardwoods.

## Custom Finishing

We pride ourselves in meeting our Customers' Finishing needs with our unique color matching capabilities.

We are one of the first Companies in the area to move from the old traditional solvent-based Finishing to a water-based system.

## Custom Millwork

We have the capability to Rip, PET, and Resaw many wood products to meet our customers' requirements.

## CNC

We meet our Customers' CNC needs with a state of the art router. We can use a Customer's drawings or we can design for you.

## Why Specialized Wood?

We go where others fear to tread. Difficult profiles? Hard to match colors or finishes? Shorter runs? Those are a perfect fit for us.

Historical reclamation and/or profile matching is also one of our specialties; as is recycling old or used stock to create new product. Even if you have been told it can't be done, you'll want to ask our team of experts. They thrive on a challenge!
